

LEARN...HAVE LUNCH ON US...BE ELIGIBLE FOR A FREE SURFACE & \$100 GIFT CHEQUES!

Communicating is the one thing we do more than anything else. We speak with each other either in person or using phones, voice, IM, text and video chat. Many times we're using different devices compounded by mixing personal and office tools to stay connected. Spend some time with us and we'll explain how businesses are bringing it all together to drive results.

If you've heard about Microsoft Office 365 and "the cloud" but are not fully aware of the value-added, you will when you leave the seminar:

- Consolidate your communications systems and remove unneeded spend on IT
- Leverage the cloud to its fullest advantage
- Avoid costly business travel and provide anytime, anywhere on any device solutions
- Benefit from added security, reliability, compliance and compatibility
- Give your team productivity tools – your biggest asset is your team – empower them to be successful
- Control costs, drive results, get connected and focus on your business

If you're already using **Microsoft® Cloud Platform – Office 365** we'll give you tips on how to leverage it with features you may not even know you can use.

Recommended attendees: CIOs, CEOs, CTO, Presidents, VPs, Small-Mid-Large Business Owners, Managing Partners, IT Decision Makers
